

One Size Does Not Fit All.

Introducing Matrax 4x8 TNG Ground Protection Mats

THE FIRST INJECTION-MOLDED 4' X 8' COMPOSITE MAT

MANUFACTURED FOR QUALITY, CONSISTENCY AND STRENGTH WITH VIRGIN HDPE PLASTIC

Matrax 4x8 TNG mats have high tensile strength, chemical and heat resistance, surface hardness and abrasion resistance. The injection molding process produces a uniform mat with uniform strength that reduces the heat/cool variations that can cause breakage.

FEATURES

- Ergonomic hand holes, which are molded into the mat versus rough cut after production, provide ease of handling and minimize stress on the mat
- Holes in all four corners allow mats to be connected
- Translucent white color minimizes heat stress on grass
- Two-sided tread pattern minimizes point loading and creates a safe and stable surface
- Mats are designed to align perfectly when stacked - no offsetting required
- Will not splinter or rot
- Easy to clean
- Reusable and recyclable
- 100% made in the USA

Specifications

Dimensions	4' x 8' x .5"
Weight	70 Pounds
Load Rating	80 Tons
Material	Virgin High-density Polyethylene (HDPE)
Color	White (Standard)
Surface Texture	Tread Pattern on Both Sides
Hand Holds	Included
