

JERSEYSILT SOCK®

THE MOST COST-EFFECTIVE SEDIMENT AND EROSION CONTROL DEVICE

Jersey Silt Sock is a linear mesh tube containing composted wood filler that is free of weeds, seeds and contaminants. An effective sediment and erosion control device, it is easy to install and remove and is environmentally friendly.

Applications:

Perimeter Control
Slope Interruption
Ditch Check

Inlet Protection
Concrete Washout
Stormwater Runoff

Recognizing the need for contractors to meet or exceed DOT specifications, we use only the highest quality wood filler and sock fabric.
